My Favourite Places in School

I go to school every day. I do a lot of activities at school.

My favourite place in school is the music room. I can see a piano, a screen and benches there. I can hear some children singing. I can also hear the teacher playing music. I can smell fresh air in the music room. I can dance, play musical instruments and practise singing there. I feel very happy when I sing.

I also like going to the computer room. I can see many computers, two projectors and some children typing on the computers. I can hear some teachers talking with students. I can also hear some children typing the keyboards. I can smell foaming hand sanitizer in the computer room. I can learn how to use the computer, draw with a mouse and play computer games there. I think the computer room is big.

I am happy at school because I can learn music in the music room and I can play computer games in the computer room.
